## **Interchange at McOrmond Drive and College Drive fully open**

For immediate release: June 3, 2019  
TC19-456

The McOrmond Drive and College Drive interchange, which has been under construction since the spring of 2017, is now open. All traffic movements are fully operational.

Construction of an interchange at Boychuk Drive and Highway 16 also got underway in 2017 and is expected to be complete this summer.

Both intersections had been experiencing rapid increases in traffic volume, delays and collisions as development continued in surrounding neighbourhoods. The most effective way to reduce the issues was to build the two new interchanges.

Both interchanges also include pedestrian and cyclist paths/walkways.
