FREQUENTLY ASKED QUESTIONS				
<p><i>Do I need a building permit to perform asbestos abatement work?</i> No. A building permit is not a permit to perform asbestos abatement work. Rather, this form is required as part of your building permit application and serves as notification to ensure the safety of building inspectors. Limited demolition or construction is expected during asbestos abatement work and jurisdiction for this work is with the Government of Saskatchewan. Provincial OH&S may be contacted at 1-800-567-SAFE (7233) or ohs.general@gov.sk.ca.</p>				
<p><i>Who is responsible for identifying asbestos containing materials?</i> The owner is responsible for identifying asbestos containing materials that are present in a place of employment and with which workers may come into contact with ACM.</p>				
<p><i>What happens if I find asbestos after I already have a building permit?</i> In the event that asbestos is discovered, you are expected to:</p> <ol style="list-style-type: none"> 1. Immediately stop work; 2. Contact Building Inspections at 306-975-7924 to notify the building inspector; and 3. Address the asbestos that has been encountered by providing notification as required by OH&S and ensuring asbestos will be dealt with according to OH&S requirements. 				
Information regarding asbestos containing materials in buildings may be found at the following:				
<ul style="list-style-type: none"> • https://www.canada.ca/en/health-canada/services/air-quality/indoor-air-contaminants/health-risks-asbestos.html • http://www.saskatchewan.ca/business/safety-in-the-workplace/hazards-and-prevention/asbestos-in-saskatchewan/understanding-identifying-and-handling-asbestos • Potential sources of ACM is depicted on the reverse side of this form 				

Potential sources of asbestos in the home

- 1 Roof felt and shingles
- 2 Loose, blown-in insulation, such as vermiculite
- 3 Incandescent light fixture backing
- 4 Roof gutters can be made of asbestos cement
- 5 Artificial fireplace logs and ashes
- 6 Acoustic tiles
- 7 Deck undersheeting
- 8 Asbestos pad under the fireplace hearth
- 9 Pipe insulation
- 10 Main panel and fuse box; each fuse wire has an individual asbestos flash guard
- 11 Door and gasket covers
- 12 Backing behind recessed lighting
- 13 Boiler and furnace insulation
- 14 Asbestos can be found in stucco
- 15 Soffit boards can be made of asbestos cement or asbestos insulating board
- 16 Textured or stipple-coated walls and ceilings
- 17 Asbestos cement (transite) board siding and undersheeting
- 18 Outlets and switches
- 19 Gypsum board filling compound, and patching and joint compound for walls and ceilings
- 20 Window putty
- 21 Flooring: vinyl tiles and linoleum sheet flooring; flooring adhesive
- 22 Downpipes can be made of asbestos cement
- 23 Insulation on electrical wires
- 24 Heat reflector for wood stove
