

SASKATOON EMPLOYMENT TRENDS

**EMPLOYMENT**  
*Profile*

**2013 Edition**

# Report Highlights

The Employment Profile presents employment statistics and trends in relation to the population, commuter flows, business activity and scale, industry sectors and geographic distribution across the City.

- In 2011, total employment in Saskatoon was estimated to be 117,210, which is an 11% increase since 2006.
- Total labour import (those who are employed within the City but who reside elsewhere) has increased by 4,315 workers or by 35% between 2006 and 2011.
- The neighbourhoods that experienced the highest level of employment growth, from 2006 to 2011, were University Heights at 39%, the Central Business District at 22% and the North West Industrial Area at 21%.
- In 2011, 69% of all licensed businesses had fewer than 10 employees.
- The construction sector experienced a 99% increase in employees from 2006 to 2011.
- The retail trade sector has the greatest number of employees at 17,385.
- 39% of all home based business employees are associated with the construction sector, followed by the business and building support sector at 20%

The information presented in this report has been compiled by the City of Saskatoon, Planning and Development Division, Business License Program. For clarity and ease of comparison, figures in this report have been rounded.

# Definitions

COMMERCIAL SPACE	Any space where a licensed business, institutional agency or other such organization may operate, excluding residential locations.
GROSS LEASABLE FLOOR AREA	The amount of space within a building used by the business operation.
INSTITUTIONAL AGENCY	An organization that is not required to obtain a City of Saskatoon commercial business license, but occupies commercial, industrial or institutional space within the city. Examples of institutional agencies include provincial and federal government agencies, Saskatoon Health Region facilities, educational facilities, urban reserve properties, charitable and non-profit groups.
LABOUR FORCE	The population 15 years and older who are defined as either employed or unemployed. The employed are persons having a job or business, whereas the unemployed are without work, are available for work and are actively seeking work (Statistics Canada 2009).
LICENSED BUSINESS	A business located within Saskatoon city limits holding a valid City of Saskatoon business license. In accordance with Business License Bylaw 8075, all businesses operating from a physical location within Saskatoon require a City of Saskatoon business license. This applies to all for-profit commercial, industrial and home based businesses in a permanent or fixed location.
NORTH AMERICAN INDUSTRY CLASSIFICATION (NAICS)	A comprehensive system of categorizing businesses by type which was developed by the statistical agencies of Canada, the United States and Mexico to provide a common statistical framework and reporting standard to facilitate the comparative analysis of the three economies (Statistics Canada 2007a).
TOTAL EMPLOYMENT	The daily net inflow of labour plus those who reported employment in Saskatoon at a usual place or worked at home. This total does not include those who reported no fixed workplace address as their employment location cannot be confirmed and may be located outside Saskatoon.

# Census Comparison

## Total Employment and Labour Force Activity

In 2011, total employment reported to the City of Saskatoon's Business License Program was 118,041. This figure is based on data gathered from 5,785 licensed commercial businesses and 792 institutional agencies.

**TABLE 1: TOTAL EMPLOYMENT, CENSUS POPULATION AND LABOUR FORCE ACTIVITY, 2006 – 2011**

	2006		2011
EMPLOYMENT (BASED ON BUSINESS LICENSE DATA)	100,965		118,041
*TOTAL EMPLOYMENT	105,410	▲ 11%	117,210
TOTAL POPULATION	202,340	▲ 10%	222,189
PARTICIPATING LABOUR FORCE	114,025		129,225
EMPLOYED LABOUR FORCE	107,705		121,830
UNEMPLOYED LABOUR FORCE	6,320		7,395
EMPLOYMENT RATIO	0.52		0.53
	Employment Ratio is Total Employment divided by the Total Population. A 0.53 Ratio indicates 53 local jobs per 100 residents.		
NET LABOUR IMPORT	7,900		10,095
	The daily net inflow of labour (defined as Labour Import less Labour Export) increased by 2,195 workers from 2006 to 2011.		

Note: Some of the 2006 figures shown above do not reflect those reported in the 2006 Employment Profile. These figures were adjusted to correlate to an alternate method of calculating Total Employment in this report.

\* Total Employment is the daily net inflow of labour plus those who reported employment in Saskatoon at a usual place or worked at home. This total does not include those who reported no fixed workplace address as their employment location cannot be confirmed and may be located outside Saskatoon.

## Census Comparison

### Place of Work Status

According to Census data, 95,480 Saskatoon residents travel to a regular workplace within Saskatoon. This figure does not include those who work at home. In addition, 14,490 employees have no fixed workplace address, which is typical of workers in the construction industry. This figure increased 46% from 2006 to 2011 which correlates to the 53% increase in licensed business growth in the Construction Industry.

**TABLE 2: SASKATOON RESIDENTS, PLACE OF WORK STATUS, 2006 – 2011**

	2006	2011
WORKED AT USUAL PLACE	92, 235	102,130
WORKED IN MUNICIPALITY OF RESIDENCE	86,615	95,480
WORKED IN A DIFFERENT MUNICIPALITY WITHIN THE SAME CENSUS DIVISION OF RESIDENCE	2,295	2,655
WORKED IN A DIFFERENT CENSUS DIVISION	2,405	2,715

# Employment Density

## Distribution of Total Neighbourhood Employment by Neighbourhood Boundary

Long range planning in Saskatoon is organized within the context of nine suburban development areas. In order to provide a clearer understanding of business and employment characteristics, the two neighbourhoods with the greatest employment are considered independently from the suburban development area in which they are located. These two neighbourhoods are the Central Business District (located in the Core Neighbourhood Area) and the U of S Management Area (located in University Heights). See Appendix A: Suburban Development Areas

# Employment Density

## Gross Distribution of Employment by Neighbourhood Boundary

Gross employment density is calculated using the total employment of each neighbourhood divided by the total area of land within each neighbourhood boundary. Neighbourhoods with the highest gross employment density are the Central Business District with 169 employees per hectare, followed by U of S Management Area with 33 and City Park with 32.

**MAP 4: GROSS EMPLOYMENT DENSITY IN 2011**

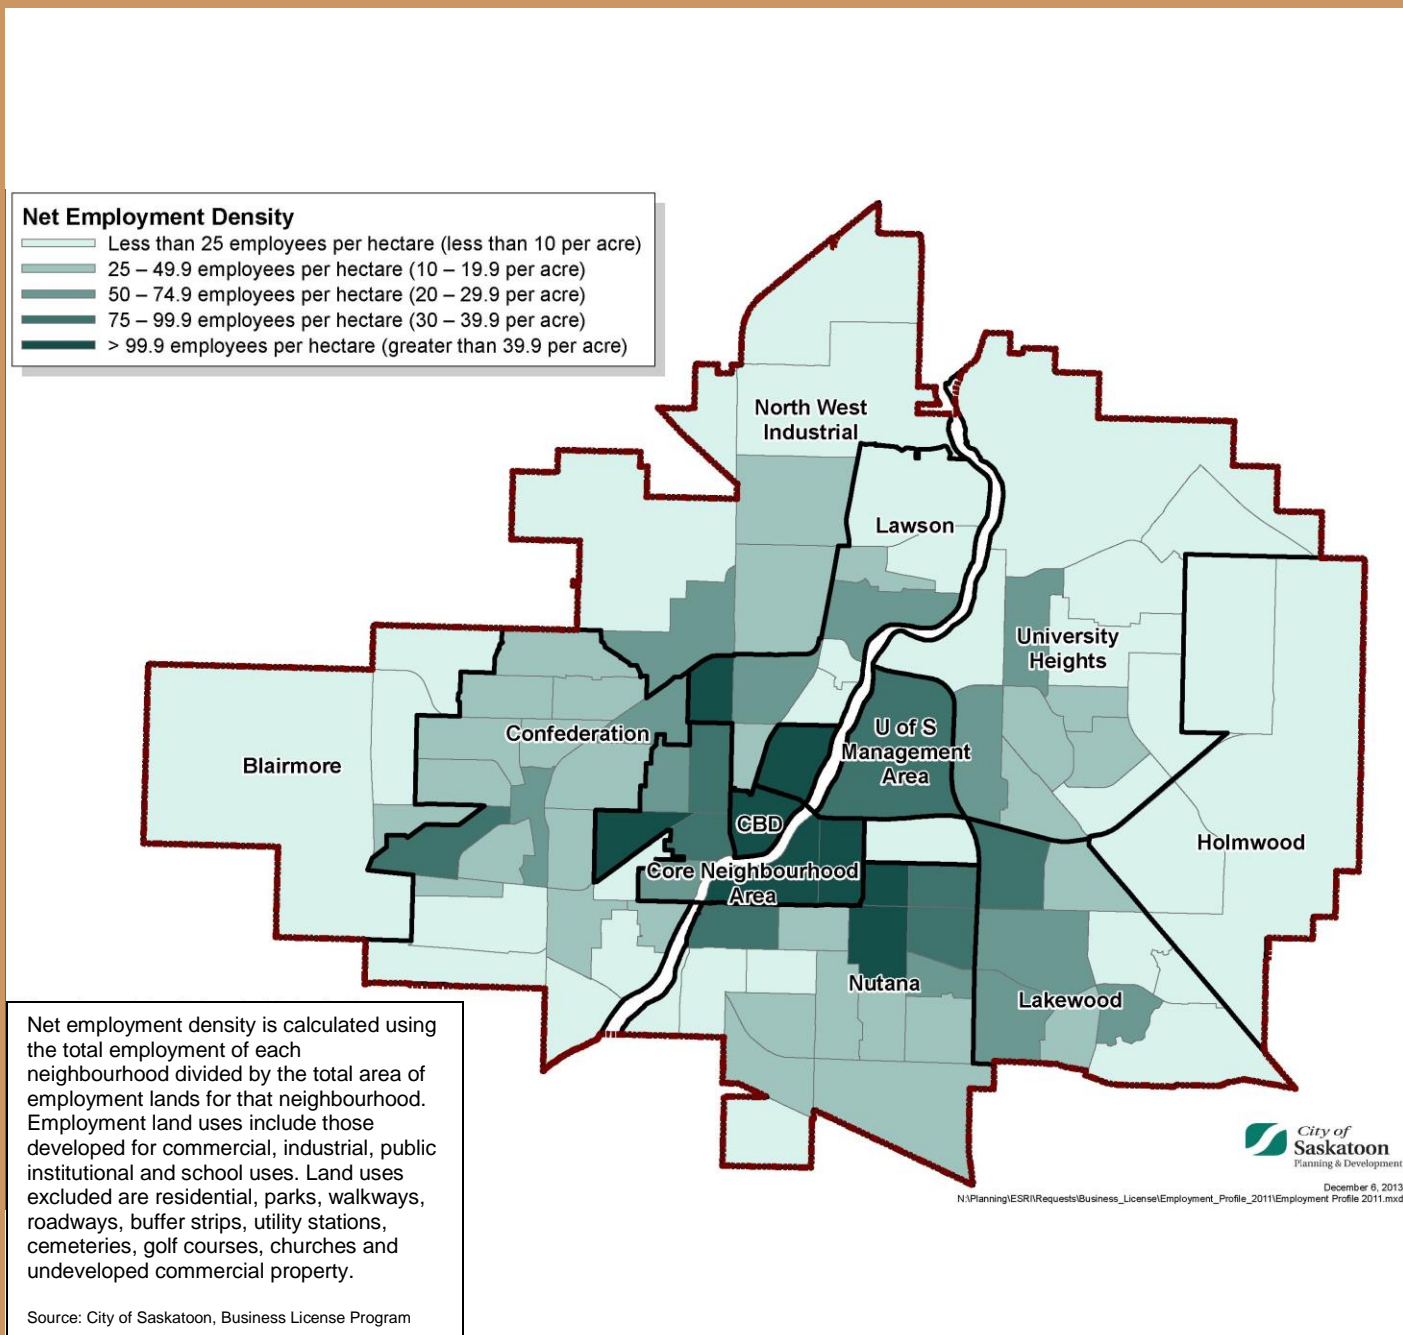

# Employment Density

## Net Distribution of Employment by Neighbourhood Boundary

Net employment density is calculated using the total employment of each neighbourhood divided by the total area of employment lands for that neighbourhood. Net area includes only lands developed for commercial, industrial, public institutional and educational uses. Residential uses, parks, walkways, roadways, buffer strips, utility stations, cemeteries, golf courses, churches and undeveloped commercial properties are excluded. Neighbourhoods with the highest net employment density are Central Business District with 465 employees per hectare, followed by Pleasant Hill with 320 and Nutana with 173.

**MAP 5: NET EMPLOYMENT DENSITY IN 2011**

# Business & Employment

## Commercial Business and Employment Totals

In 2011, there were 6,577 businesses operating in Saskatoon. This includes all licensed commercial businesses and institutional agencies operating in institutional, commercial, industrial and specialized zoning districts. Data was collected from 5,785 licensed commercial businesses and 792 institutional agencies. Suburban development areas with the highest proportion of licensed businesses and institutional agencies are North West Industrial with 24% of the total number of businesses in Saskatoon, followed by Central Business District with 19% and Core Neighbourhood Area with 11%.

# Business & Employment

## Commercial Businesses by Employee Numbers

Saskatoon's business community is primarily made up of small business: 45% of all businesses have less than five employees, while another 24% have between five and nine employees. There are 39 businesses that have 300 or more employees. Of these 39 businesses, 26% are located in the Core Neighbourhood Area, 23% are within the Central Business District and 18% are within the North West Industrial area.

# Business & Employment

## Commercial Employment by Industry Sector

Commercial and Institutional businesses can be divided into two major sectors: goods-producing and services-producing. Saskatoon's economy is primarily made up of businesses in the services producing sector, with Retail Trade and Other Services sectors accounting for 34% of all businesses. However, these two sectors account for only 20% of all employment. Industry sectors providing the highest proportion of employment are Retail Trade, Educational Services, and Health Care and Social Assistance making up 39% of the total employment.

## Home Based Employment by Industry Sector

The home based business sector continues to experience strong growth and outpaces the commercial sector. The Construction industry makes up 33% of the total number of home based businesses and even a greater percentage of the total employment within the home based business sector at 39%. The next three leading sectors (Business & Building Support, Professional, Scientific and Technical Services and Other Services) combined make up 40% of the total home based business employment.

## Growth Trends

All suburban development areas have experienced employment growth since 2008, ranging from 3% in Confederation to 31% in University Heights. The North Industrial suburban development area has the largest proportion of Saskatoon's total employment. Since 2008, this area has experienced an average annual employment growth rate in employment of 4%.

## Growth Trends

Employment rates continue to show a steady increase. Since 2001, part time employment has remained relatively stable while full time employment has increased steadily. As identified in Figure 5, home based business growth continues to outpace commercial growth. Home based businesses comprised 41% of total licensed businesses by the end of 2013.

**FIGURE 4: EMPLOYMENT OF LICENSED COMMERCIAL BUSINESSES, 2001- 2013**

## Conclusion

Business and employment opportunities in Saskatoon continue to grow with the overall economy and population. The 2013 edition of the Employment Profile has identified that the City's expansive regional service area continues to support a strong and growing services-producing sector. Within the services-producing sector, businesses classified as Professional / Scientific / Technical industries showed the greatest level of growth between 2006 and 2011 at 37%.

Small businesses continue to make a significant contribution to the economy as commercial businesses having fewer than 10 employees make up 69% of all licensed businesses in the City. This thriving entrepreneurial business community is also reflected in the growing number of licensed home based businesses. From 2006 to 2011 the number of home based businesses increased from 2,205 to 3,829.

Construction businesses act as the foundation of home based business development, as 33% of all home based businesses report involvement in this industry. Commercial employment numbers in the Construction sector also remain high, comprising 5% of total employment in 2011 and nearly doubling since 2006.

The downtown core continues to play a significant role in providing business and employment opportunities. While the total number of businesses in the downtown decreased by 5%, a 22% increase in total employment reflects a transition from smaller to larger scale businesses in the Central Business District.

As the City plans for a population of half a million, the goal is to guide development in order to achieve a balanced distribution of employment areas that are well designed and accessible by all modes of transportation. In order to meet this goal it is imperative that the City, developers and the business community have a clear understanding of statistics and trends in employment, commuter flows, business activity, and distribution of employment across industry sectors and our neighbourhoods. This perspective on employment ensures the City remains economically competitive and continues on a path of providing appropriate employment opportunities and closer live / work relationships through policy and future development

# APPENDIX A: SUBURBAN DEVELOPMENT AREAS
