

## McOrmond Drive and College Drive interchange work resumes Wednesday

For immediate release: April 2, 2019 - 9:31am  
TC19-286

Construction of the new McOrmond Drive and College Drive interchange resumes on Wednesday, April 3, 2019.

This phase of work includes removing the temporary ramp currently in place to accommodate southbound traffic on McOrmond Drive going westbound on College Drive towards the university and downtown. Removing the temporary ramp is necessary so crews can start building the permanent southbound lanes.

Until the new lanes are built, [southbound traffic will be reduced to one lane and must use the permanent ramp on the new interchange to go westbound](#). Delays are expected, especially during the morning peak time. Northbound traffic heading into the Willowgrove, Erindale, and Arbor Creek areas will not be affected.

Work on the McOrmond Drive and College Drive interchange and the new interchange at Boychuk Drive and Highway 16 will be complete this summer.
