Date

**SECTION D – GENERAL INFORMATION****SECTION A – PROJECT INFORMATION**

**Type of Building Being Demolished** means the primary construction materials and type of structure.

- ie. steel warehouse, wood frame house, brick school etc

**Demolition Date(s)** means the date timeframe planned for the demolition to start and be completed.

**Owner** means the owner of the site / building being demolished.

**Contractor** means the contractor completing the demolition.

- If the owner is also acting contractor please indicate that here.

**SECTION B – MATERIAL INFORMATION****Landfill locations**

- Please note that rates and acceptable materials are at the discretion of the facility management.

1. Saskatoon Regional Waste Management Centre  
42 Valley Road  
(306) 975-2476 or [saskatoon-regional-waste-management-centre](#)  
Hours: 8:00 am to 4:45 pm (year round)
2. Northern Landfill (operated by Loras)  
Luthern Road, 1 mile East of Highway 12  
(306) 242-8909 or [Loras-Northern-Landfill-10](#)  
Hours: Mon – Fri, 7:00 am to 5:30 pm & Sat, 9:00 am to 4:30 pm

**Material Definitions**

1. Clean Fill Materials are defined as: inert concrete, reinforced concrete, stones, bricks, cindercrete, tile/ceramics, soil and sand that does not cause any adverse environmental impacts or any public health or safety concerns.
2. Mixed Fill Materials are defined as: any combination of construction and demolition wastes not acceptable as clean fill.

3. Hazardous Materials are defined as: materials that have high potential for harm to human health and the environment if handled or disposed of improperly.
  - Residents are required to have all hazardous materials removed as a part of the demolition process. A qualified abatement contractor must remove materials such as asbestos and fuel tanks from the site. If these materials are to be removed from your site, please attach an abatement plan listing the types and volume of hazardous material, manner in which it is to be removed, name, address and contact number of qualified abatement contractor doing the work, and the method of disposal, including disposal destination.
  - For Further information regarding requirements for disposal of demolition waste please call City of Saskatoon, Environmental Protection Department (306) 975- 2487
  
4. Materials Separated for Re-Use or Recycling
  - The City of Saskatoon encourages residents to reuse or recycle materials salvaged from demolition projects. If residents are unable to make use of materials from their demolition project, they are encouraged to contact a salvage company that may make use of those materials.
  - Please
    - visit [saskatoon-regional-waste-management-centre](https://www.saskatoon.ca/region/waste-management-centre) for more information on recycling options.
    - refer to the Saskatchewan Environment fact sheet "[Construction/Demolition Waste Recycling and Disposal](#)"
